Index to Volumes 77–82, 1981–1985 Authors - Subjects - Titles

Articles are indexed by title, authors, and subjects. All listings provide the Volume and Number of the issue in which the item can be found. The Volume and Number correspond to dates as follows:

Volume	*Year*	*Number*	*Month*
78	1981	1	Dec/Jan
79	1982	2	Feb/Mar
80	1983	3	Apr/May
81	1984	4	June/July
82	1985	5	Aug/Sep
		6	Oct/Nov

accounting,
Energy Accounting and Analysis—The Carborundum System, V. 78, No. 4, pp. 49–66; *HVAC System Analysis: Energy Accounting*, V. 80, No. 2, pp. 31–34
air; air movement strategies; history of air quality; *Effects of Air Supply on Space Energy Consumption*, V. 78, No. 6, pp. 43–61
air cleaning; air movement; *Recycling Plant Air*, V. 79, No. 2, pp. 12–39
air conditioning, and ozone layer; *The CFC/Ozone Depletion Problem*, V. 79, No. 2, pp. 40–48
air preheating; *Economics of the Heat Pipe Air Preheater for Primary Air Service*, V. 78, No. 2, pp. 28–44
Alexander, J. C., *Calculation of Direct Energy Losses from Ceiling Mounted Radiant Heating Panels to Fenestrated Areas*, V. 78, No. 5, pp. 35–48
American Institute of Chemical Engineers, *Synthetic Fuels—The Chemical Engineer's Perspective*, V. 82, No. 3, pp. 25–31
Analysis of Pressure Reducing Station for Cogeneration, by Charles J. Kibert and William A. Smith, V. 80, No. 1, pp. 5–15
Analyzing Electric Bills to Cut Costs, by Abraham Krufka, V. 80, No. 2, pp. 45–51
Anderson, Jerry W., Jr., *Infrared: What It Is, How It Works, and How and Where It Can Be Used in Energy Evaluation and Analysis*, V. 81, No. 6, pp. 29–36
ANSI [American National Standards Institute] Pipe Schedules, V. 79, No. 1, pp. 11-12
Anthracite, *Why Anthracite? A Perspective from Anthracite Industry Association*, V. 82, No. 6, pp. 38–41
Anthracite Culm Combustion to Generate Steam, by Claire H. Sink, V. 82, No. 1, pp.15–17
Application of Carbon to Solar Cells, V. 79, No. 4, pp. 61–62
Application of the Principles of Hamilton and Fermat to Energy System Productivity, by John Soma, V. 81, No. 1, pp. 39–48

Arney, Mark, *P-Chart—A Passive Solar Design Method*, V. 78, No. 3, pp. 41–50
An Audit of the Energy Consumption in the City of Riverside, CA: Methodology and Results, by Sherwood G. Talbert and Frank E. Jakob, V. 78, No. 3, pp. 23–40
Austerweil, Louis,
Energy Economic Indicator, V. 82, No. 4, pp. 37–52;
Graphic Representation of the Variable-Bin Method, V. 78, No. 4, pp. 9–36
Australian Solar Heat Pump, V. 79, No. 6, pp. 21–24
Automatic Lighting Output System, V. 79, No. 1, pp. 49–55
Baltes, Robert T., *Cogeneration: Arizona vs. California*, V. 82, No. 3, pp. 37–42
Bhatnagar, R., *Development, Design and Implementation of a Microprocessor Based Power Demand Controller*, V. 82, No. 2, pp. 20–37
Blake, Frederick H., *New Energy Management Controls for Supermarkets*, V. 78, No. 5, pp. 49–54
body heat, *A Life-Size Dummy for Human Body Heat Measurements*, V. 79, No. 2, pp. 69–71
Bohn, Hinrich L., *Heat Recovery and Smoke Removal from Residential Wood and Coal Flue Gases by Gravel Columns*, V. 80, No. 1, pp. 19–29
Boiler Combustion Testing, by Andrew J. Susemichel, V. 78, No. 2, pp. 34–37
boiler efficiency, *Heat Recovery and Boiler Efficiency, A Compilation of Papers Presented at the National Conference on Heat Recovery and Boiler Efficiency*, V. 78, No. 2, pp. 5–53
boiler fuels, *Coal and Oil Emulsions as Boiler Fuels*, V. 78, No. 2, pp. 45–50
Bonwick, W. J., *Electrical Energy Considerations and Payment in an Australian University*, V. 81, No. 5, pp. 24–46
Branover, Yirmiyahu, and heat-to-electricity process, *Energy Plan May Be Near Commercial Breakthrough*, V. 82, No. 3, p. 52
Britain, use of coal for heating, *Coal-Fired Appliances for Residential and Commercial Buildings*, V. 82, No. 1, pp. 20–24
Brooks, Pauline P., *Industrial Waste Heat for District Heating*, V. 79, No. 6, pp. 7–17
Bullock, Gary G., Jr., *Energy Management Systems: A Critical Analysis*, V. 79, No. 5, pp. 21–36
Burger, Robert, *Cooling Towers: Energy Conservation Strategies*, V. 81, No. 4, pp. 53–64
Burr, Mark D., *Heat Recovery and Smoke Removal from Residential Wood and Coal Flue Gases by Gravel Columns*, V. 80, No. 1, pp. 19–29
Calculations of Direct Energy Losses from Ceiling Mounted Radiant Heating Panels to Fenestrated Areas, by J. C. Alexander, V. 78, No. 5, pp. 35–48
Campbell, John C., *How to Minimize Energy Consumption with Variable-Speed Fan Control*, V. 79, No. 5, pp. 54–70
Cappadona, W. J., *Electrical Energy Considerations and Payment in an Australian University*, V. 81, No. 5, pp. 24–46
Case studies,
An Audit of the Energy Consumption in the City of Riverside, CA: Methodology and Results, V. 78, No. 3, pp. 23–40;
Cogeneration at a Residential Complex, V. 78, No. 6, pp. 39–42;
Cogeneration Plant for Catholic University of America: A Case Study, V. 82, No. 2, pp. 38–61;
Electrical Energy Considerations and Payment in an Australian University, V. 81, No. 5, pp. 24–46
An Energy Management Case Study of the Quinco Consulting Center, A Comprehensive Commercial Mental Health Center in Columbus, Indiana, V. 80, No. 6, pp. 8–21;
Energy Management—Peoria Public Schools, V. 81, No. 3, pp. 8–73;
Medical Research Facilities Case Study, V. 82, No. 4, pp. 23–36;

Moderate Temperature Heat Recovery, V. 81, No. 6, pp. 36–45;
Power Factor Controllers, V. 82, No. 5, pp. 13–27;
The Role of Site Measurement in Energy Studies, V. 82, No. 3, pp. 15–24
The CFC, [clorofluorocarbon]*/Ozone Depletion Problem*, by Thomas C. Edwards, V. 79, No. 2, pp. 40–48
chemical industry, *Cogeneration in the Chemical Industry*, V. 79, No. 5, pp. 7–20
Chen, A. A., *Model of Solar Radiation Using Total Cloud Cover and Percentage Sunshine Measurements*, V. 80, No. 6, pp. 26–45
clorofluorocarbon, see CFC
coal,
combustion research, *Scientists Fuel the Study of Fire*, V. 80, No. 1, pp. 35–36;
conversion to liquid fuel,
Fuels—Today and Tomorrow, V. 78, No. 2, p. 70
Synthetic Fuels—The Chemical Engineer's Perspective, V. 82, No. 3, pp. 25–31
Fuels—Today and Tomorrow, V. 78, No. 2, *passim*;
gasification,
A Coal Gasification Demonstration Plant, V. 79, No. 4, pp. 63–64;
Coal Gasification in 1985, V. 79, No. 6, p. 36;
Fuels—Today and Tomorrow, V. 78, No. 2, pp. 60–80, *passim*;
The Market for Gas from Coal, V. 78, No. 4, pp. 37–48;
Heat Recovery and Smoke Removal from Residential Wood and Coal Flue Gases by Gravel Columns, V. 80, No. 1, pp. 19–29;
Induction Heating in Situ of the Solid Fossil Fuels, V. 81, No. 5, pp. 11–23;
The Market for Gas from Coal, V. 78, No. 4, pp. 37–48;
post-combustion cleaning devices, *Coal-Fired Appliances for Residential and Commercial Buildings*, V. 82, No. 1, pp. 18–30;
Problems and Solutions to the Utilization of Coal for Stoker Applications, V. 78, No. 2, pp. 38–44;
Why Anthracite?, V. 82, No. 6, pp. 38–41
Coal and Oil Emulsions as Boiler Fuels, by John A. Dillon, Jr., and Charles Plank, V. 78, No. 2, pp. 45–50
Coal-Fired Appliances for Residential and Commercial Buildings, by B. A. Nichols, A. Eckels, M. Meredity, V. 82, No. 1, pp. 18–30
A Coal-Gasification Demonstration Plant, V. 79, No. 4, pp. 63–64
Coal Gasification in 1985, V. 79, No. 6, p. 36
coefficient of performance, for heat pumps,
Energy Economic Indicator, V. 82, No. 4, pp. 38–43;
Exergy Analysis Elucidates Heat Pump Efficiency, V. 82, No. 3, pp. 32–36
cogeneration,
Analysis of Pressure Reducing Stations for Cogeneration, V. 80, No. 1, pp. 5–15;
economics of, *Energy Economic Indicator*, V. 82, No. 4, pp. 42–52;
Feasibility of Fuel-Cell Cogeneration, V. 79, No. 6, p. 33;
plant sizing, *Cogeneration: Arizona vs. California*, V. 82, No. 3, pp. 40–42;
Power-Grid-Connected Cogeneration Demonstration Plant at Clark University, V. 78, No. 5, pp. 55–60
Cogeneration: Arizona vs. California, by Robert T. Baltes and William J. Murphy, V. 82, No. 3, pp. 37–42
Cogeneration at a Residential Complex, V. 78, No. 6, pp. 39–42
Cogeneration at MacDonald's, V. 82, No. 4, pp. 4–6
Cogeneration Blueprint for State Facilities, by Michael Garland, V. 79, No. 1, pp. 13–32
Cogeneration in the Chemical Industry, by W. L. Johns, V. 79, No. 5, pp. 7–20
Cogeneration Plant for Catholic University of America: A Case Study, by Enrico Sciubba, V. 82, No. 2, pp. 38–61

COMMEND End-use Model, *End Use Planning for the Commercial Sector*, V. 82, No. 6, pp.30–37

A Compressed-Air Energy Storage (CAES) Unit in the U.S., by Nadine Lihach, V. 80, No. 4, pp. 29–32

computer use, computerization, computerized energy management, microprocessor applications,
Development, Design and Implementation of a Microprocessor Based Power Demand Controller, V. 82, No. 2, pp. 20–37;
A Digital Control System for Lighting and HVAC, V. 82, No. 2, pp. 4–19;
Direct Digital Control for Buildings, V. 80, No. 5, pp. 5–14;
Graphic Representation of the Variable-Bin Method, V. 78, No. 4, pp. 9–36;
EMS Margin of Success—Operator, Application, System, V. 82, No. 1, pp. 31–42;
Energy Conservation Investment Analysis: A Microcomputer Approach, V. 82, No. 3, pp. 9–14;
An Energy Management Case Study of the Quinco Consulting Center, V. 80, No. 6, pp. 16–21;
Graphic Representation of the Variable-Bin Method, V. 78, No. 4, 9–36;
In Search of an Energy Management Program, V. 81, No. 4, pp. 35–38; V. 79, No. 2, pp. 61–64;
Internal Energy Keeps Building Warm Down to 12F, V. 78, No. 3, p. 21;
Linear Programming for Siting of Energy Facilities, V. 82, No. 1, pp. 5–14;
Microcomputer-Based Temperature Controller, V. 80, No. 4, pp. 33–34

Computers for Facilities and Energy Management, by W. Ray Jones, V. 79, No. 1, pp. 40–48

Condensation Heat Recovery Applications for Industrial Building, by KVB, Inc., V. 81, No. 2, pp. 8–27

conservation, see energy conservation and efficiency

cooling towers,
Energy Management Process, a Manual, V. 78, No. 1, p. 39
maintenance, *Energy Management Process, a Manual*, V. 78, No. 1, pp. 41–42;
How to Minimize Energy Consumption with Variable-Speed Fan Control, V. 79, No. 5, pp. 54–70;
HVAC System Analysis: Checking Equipment Efficiency, V. 81, No. 4, pp. 51–52

Cooling Towers: Energy Conservation Strategies, by Robert Burger, V. 81, No. 4, pp. 53–64

Coombes, C. A., *Transient Analysis of a Radiation Test Cell Using Continuous Systems Simulation Language*, V. 82, No. 5, pp. 35–48

Corey, Robert W., *How to Minimize Energy Consumption with Variable-Speed Fan Control*, V. 79, No. 5, pp. 54–70

CO_2, and the greenhouse effect, *Major Climatic Changes? The CO_2 Debate*, V. 81, No. 4, pp. 11–23

Cowing, Thomas W., *A Survey Technique for Characterizing Energy Use in Automobile Dealership Buildings*, V. 81, No. 6, pp. 46–53

A Critical View of Perimeter Radiation, by Samuel Lomask, V. 79, No. 3, pp. 42–47

culm, *Anthracite Culm Combustion to Generate Steam*, V. 82, No. 1, pp. 15–17

"cyclones," to clean coal gas,
Anthracite Culm Combustion to Generate Steam, V. 82, No. 1, p. 22;
New Way to Clean Coal Gas, V. 82, No. 4, pp. 9–10

Dahlberg, Michael D., *Linear Programming for Siting of Energy Facilities*, V. 82, No. 1, pp. 5–14

degree days, change in the base through weatherization, *Residential Energy Conservation Strategy*, V. 82, No. 6, pp. 14–21

dehumidifier, *SERI Debumidifier Wheel Promises Cost-Effective Dessicant Cooling*, V. 80, No. 6, pp. 46–50

demand control, *Energy Management Process, a Manual*, V. 78, No. 1, pp. 73–76

demand systems, *Graphic Representation of the Variable-Bin Method*, V. 78, No. 4, pp. 23–25
dessicent cooling, see dehumidifier
Development, Design and Implementation of a Microprocessor Based Power Demand Controller, by R. Bhatnagar and S. Rahman, V. 82, No. 2, pp. 20–37
A Digital Control System for Lighting and HVAC, by William L. Wayman, V. 82, No. 2, pp. 4–19
Dillon, John A., Jr., *Coal and Oil Emulsions as Boiler Fuels*, V. 78, No. 2, pp. 45–50
Direct Digital Control for Buildings, by Richard J. LeBlanc, V. 80, No. 5, pp. 4–14
district heating,
Hot Water District Heat in St. Paul, V. 79, No. 5, pp. 37–40;
Industrial Waste Heat for District Heating, V. 79, No. 6, pp. 7–17
Dow, John O., *A Survey Technique for Characterizing Energy Use in Automobile Dealership Buildings*, V. 81, No. 6, pp. 46–53
downdraft combustion, *Coal-Fired Appliances for Residential and Commercial Buildings*, V. 82, No. 1, pp. 18–30
Duncan, Michael, *Heat Recovery and Smoke Removal from Residential Wood and Coal Flue Gases by Gravel Columns*, V. 80, No. 1, pp. 19–29
An Easy Way to Find the Conditions of Mixed Air Streams, by Adam Zanker, V. 80, No. 4, pp. 7–14
Eckels, A., *Coal-Fired Appliances for Residential and Commercial Buildings*, V. 82, No. 1, pp. 18–30
Eckhart, Michael T., *The Market for Gas from Coal*, V. 78, No. 4, pp. 37–48
ECIP's [Energy Conservation Improvement Projects], *How to Estimate the Cost and Savings of Energy Audit Opportunities*, V. 80, No. 2, pp. 19–30
economic analysis for conservation, *Energy Economic Indicator*, V. 82, No. 4, pp. 37–52
Economics of the Heat Pipe Air Preheater for Primary Air Service, by H. N. Franklin, V. 81, No. 2, pp. 28–44
Edwards, Thomas C., *The CFC/Ozone Depletion Problem*, V. 79, No. 2, pp. 40–48
Effects of Air Supply Rates on Space Energy Consumption, by D. Paul Mehta, V. 78, No. 6, pp. 43–61
Effects of Control Dynamics on Energy Consumption in Residential Heating Systems, by D. Paul Mehta, V. 80, No. 3, pp. 7–24
efficiency, see energy conservation, and efficiency
electrical energy budgeting, *Electrical Energy Considerations and Payment in an Australian University*, V. 81, No. 5, pp. 24–46
electric bills, structure of,
Analyzing Electric Bills to Cut Costs, V. 80, No. 2, pp. 45–51;
Energy Management Process, a Manual, V. 78, No. 1, pp. 70–72
electric demand after power outages, *New Energy Management Controls for Supermarkets*, V. 78, No. 5, pp. 52–54
Electrical Energy Considerations and Payment in an Australian University, by W. J. Bonwick and W. J. Cappadona, V. 81, No. 5, pp. 24–46
electric power, see also photovoltaics
conservation measures, pp. 44–50, and power survey, pp. 19–22, *Energy Management Process, a Manual*, V. 78, No. 1;
In Search of an Energy Management Program, V. 79, No. 2, pp. 64–66; V. 81, No. 4, pp. 38–40
generation, *Energy Plan May Be Near Commercial Breakthrough*, V. 82, No. 3, p. 52
loss, *An Overview of I^2R Line Losses*, V. 79, No. 5, pp. 43–53
Trends in Electric Power Technology, V. 79, No. 6, pp. 25–30
Electric Power Research Institute (EPRI), *End-Use Planning for the Commercial Sector*, V. 82, No. 6, pp. 30–36
Electronic Ballast Compared, V. 79, No. 3, pp. 48–49

EMS [Energy Management Systems] *Margin of Success—Operator, Application, System,* by Cynthia M. Kasper and Dennis E. Miller, V. 82, No. 1, pp. 31–42
End-Use Planning for the Commercial Sector, by the Electric Power Research Institute (EPRI), V. 82, No. 6, pp. 30–36
energy accounting, *HVAC System Analysis: Energy Accounting,* V. 80, No. 2, pp. 31–34
Energy Accounting and Analysis—The Carborundum System, by Butch Lesniak and Ron Reed, V. 78, No. 4, pp. 49–66
energy audit,
An Audit of the Energy Consumption of the City of Riverside, CA, V. 78, No. 3, pp. 23–40;
An Energy Management Case Study of the Quinco Consulting Center, V. 80, No. 4, pp. 10–11;
Energy Management Process, A Manual, V. 78, No. 1, pp. 67–69;
How to Estimate the Cost and Savings of Energy Audit Opportunities, V. 80, No. 2, pp. 19–30;
HVAC System Analysis: Energy Audit Review, V. 80, No. 2, pp. 31–34;
In Search of an Energy Management Program, V. 79, No. 2, pp. 49–68; V. 81, No. 4, pp. 24–42;
Plumbing Factors in the Energy Audit, V. 78, No. 1, pp. 81–82;
Rapid Estimation of Second Law Inferences After a First Law Energy Audit, V. 79, No. 1, pp. 33–39;
The Role of Site Management in Energy Studies, V. 82, No. 3, pp. 15–24
energy chain, *Fuels—Today and Tomorrow,* V. 78, No. 2, pp. 62–63
energy conservation and efficiency, see also entries under energy management, cogeneration, heat recovery, solar, etc., as well as individual titles—
Automatic Output Lighting System, V. 79, No. 1, pp. 49–55;
Cooling Towers: Energy Conservation Strategies, V. 81, No. 4, pp. 53–64;
A Critical View of Perimeter Radiation, V. 79, No. 3, pp. 42–47;
A Digital Control System for Lighting and HVAC, V. 82, No. 2, pp. 4–19;
Effects of Control Dynamics on Energy Consumption in Residential Heating Systems, V. 80, No. 3, pp. 7–24;
